

SENSYMASTER

ABOUT

High quality and cost effective solution for precise and dynamic direct mass flow measurement for gases

FMT200

SYSTEM INTEGRATION FLOWMETER

These transmitters are specifically designed to make system integration as easy as possible

BENEFITS + FEATURES

- High speed Modbus RS485 output
- FMT230 is ideally suited for all OEM standard applications
- FMT250 adds high accuracy and functionality for advanced OEM applications

FMT400

FLOWMETER FOR INDUSTRIAL APPLICATIONS

The transmitter features ABB's common operating concept with common menu structures and through-the-glass-operation without opening the housing

BENEFITS + FEATURES

- Up to five inputs and outputs
- Easy Maintenance
- Utmost data security with plug-and-play electronic exchange
- Suited for all industrial standard applications
- High accuracy and extended functionality for advanced industrial applications
