

Environmental Policy

Organisation

Andrew Carter – Finance Director has overall responsibility for environmental matters within the company

All Staff – Have a responsibility to ensure environmental policies are adhered to, make suggestions for improvements and report any instances where the environment has or may suffer as a result of KC Controls intervention.

General Policy / Arrangements

KC Controls (UK) LLP (KC Controls) recognises the fact that the environment plays a very important part in the future of the world in which we operate and certain precautions can be taken to minimise our impact on it. In view of this KC Controls will strive to give continual improvement in the following areas:

- Waste Management – All waste produced by KC Controls will be disposed of via the correct channels using licensed operators.
- Recycling – KC Controls aims to recycle as much of the waste it produces as possible. Waste paper should be placed in the secure bins please around the premises for recycling and all other recyclable material should be placed in the main recycle bin located in the car park.
- Resource Management – All lights are to be switched off when not in use and where possible timer switches are to be fitted to heaters and other such appliances. Staff are encouraged to switch PC and monitors off when they leave the building.
- Sharing Resources – All staff are encouraged to car share when possible in order to reduce fuel costs, emissions and traffic congestion.
- Reducing usage – KC Controls has installed LED lighting throughout the building which has reduced our electricity usage.

Although it is KC's management who are in overall control of environmental issues within the group, it is the responsibility of all individuals to ensure that the most appropriate action is taken regarding any issues that affect the environment.

Emergency Plan / Arrangement

Should any instance occur where, through an action of KC Controls, its employees or sub-contractors, the environment has suffered or may suffer then the individual should contact Andrew Carter (andrewc@kccontrols.co.uk or 07796 687094) immediately. Andrew Carter shall take appropriate action to stop, clean, repair and/or mitigate the issue in a suitable time scale using all available resources.
